T-70
with asymmetric table top, suitable for 1 large ophthalmic instrument

T-70
with special shaped table top for 1 large ophthalmic instrument plus **iMac** Computer, ideal for fundus camera **Cobra** or Scheimpflug camera **Sirius**

Instrument Tables Series T-70

The fresh colour design of the T-70 table series matches every interior perfectly.

table base: RAL 7024 graphite grey
table top: RAL 9003 signal white
cover plates: RAL 9007 grey aluminium

The pleasantly shaped table tops are available in different sizes, each suitable for your needs.
- Whether it's for one or two devices, with or without a computer.

The motor lifting column is very quiet and reliable. Depending on the requirements it is placed centrally or asymmetrically.

The modern concept of the T-70 gives you the option to upgrade up to two practical cable guides **through the table** top very easily. Therefore the table top has prefabricated perforations. So all annoying power and data cables disappear elegantly next to the device.

Schuko sockets to **power your devices** are located directly below the table top.

Braked **castors** are available as optional accessory.

Specifications

height: 72 cm bis 115 cm
adjustment range: 43 cm

Maximum table load
with central column 80 kg without castors
50 kg with castors
with asymmetric column 80 kg without castors
40 kg with castors

power supply: 230 V / 50 Hz
connected load: 450 W / max 2,0A
