VIEW®

TAKE THE
VIEW WITH
YOU

Everyone SHOULD HAVE ONE

The VistaView® was designed with the vision of addressing the overwhelming need that every eye doctor should have their own reliable, affordable, connected retinal camera without having to compromise on quality.

The VistaView integrates the power of Volk optics with the simplicity, portability, and affordability of smartphone technology, allowing everyone access and ownership of a quality portable, mydriatic retinal camera.

Do More. Pay Less.

Powered by Volk optics, **capture sharp, 55°** retina images with ease. The VistaView streamlines your patient data workflow, saving you time! Whether you are opening your first practice or adding portability to your existing imaging services, bypass the burden of heavy financing and rental agreements. Expand your reach by **owning your very own personal camera.**

Be Untethered. Stay Connected.

Take your VistaView anywhere! With its extremely light and ergonomic design that easily fits in your bag, you can take **exam room quality images anywhere** from waiting rooms to patient rounds to nursing homes and screening campaigns. Instantly generate reports with patient images and your notes on the spot. **Easily share reports and export DICOM** images for billing, consultations, and referrals on the go.

So Simple. Anyone Can Image.

We worked with you to make this device so obvious to use, you'll be up and imaging right out of the box. Anyone on your team can take high quality images in no time, without needing hours of demos, training, and learning – ideal for high staff turnover situations. The VistaView is also **perfect for busy residents**, who are always on the go.

One Device TO DO IT ALL

From patient entry all the way through imaging, review, education, report generation, and data sharing, the VistaView will be your **all-in-one solution** - on the go.

“A Complete IMAGING EXPERIENCE

Overall, I am very impressed with the VistaView. It is easy-to-use and the image quality is really good. One of the most impressive features about the camera is the red-free images, especially when I am seeing patients for diabetic retinopathy detection and monitoring retinal changes. This helps retina specialists review red-free images to quickly determine hemorrhages and detect exacerbations, cotton wool spots, microaneurysms, and many other vascular anomalies as well. The device lets you add detailed patient information and clinical notes in a consolidated app.”

- Rishi Singh, MD Retina Surgeon

Medical Director of Informatics Cole Eye Institute, Cleveland Clinic, OH, USA
